By 30th April 2021, over 1.7 crore Indians had been infected by the COVID virus. India was reporting the highest number of new cases each day, and the brunt of the pandemic was the harshest on the most vulnerable members of our community.

On April 26th, 2021, 30% of the Dasra team was affected by the pandemic. But with the second wave hitting India incrementally, we were eager to support non-profits and vulnerable communities. This is when and why we started #BackTheFrontline, with the hope of providing a little light in some dark times.

We are humbled by the support we have received from all of you. Thank you for helping us scale this initiative to over $10 million, and supporting 152 non-profits. Through #BackTheFrontline, we are also reminded that non-profits are the true heroes and really the backbone of our country. As we continue to keep our communities at the epicentre of our work, we welcome you to read this report and be proud of the impact your contribution has created.

With gratitude,
Deval and Neera

Deval Sanghvi  
Co-Founder & Partner

Neera Nundy  
Co-Founder & Partner
We began our COVID relief efforts with supporting Mission Oxygen, but quickly realized that restricting support to providing oxygen equipment would hold us back from reaching the most vulnerable, and from supporting non-profits that were stretched & capital-starved at the peak of the pandemic. **With this objective, Dasra launched #BackTheFrontline.**

### Origin & Evolution

**BTF Launch**

- **Webinar | Against All Odds - The Plight & Contribution of India non-FCRA NGOs**
- **Investment Committee Constituting 4 Dasra Leaders & 1 NGO Leader (Priya Agarwal, Antarang)**

**NGOs onboarded**

- Apr '21: 7 NGOs
- May '21: 51 NGOs
- Jun '21: 67 NGOs
- Jul '21: 90 NGOs
- Sept '21: 114 NGOs
- Oct '21: 143 NGOs
- Nov '21: 143 NGOs
- Dec '21: 152 NGOs
- Jan '22: 152 NGOs
- Mar '22: 152 NGOs

**Funders onboarded**

- Apr '21: 161 Funders
- May '21: 401 Funders
- Jun '21: 428 Funders
- Jul '21: 444 Funders
- Sept '21: 462 Funders
- Oct '21: 463 Funders
- Nov '21: 465 Funders
- Dec '21: 467 Funders
- Jan '22: 467 Funders
- Mar '22: 467 Funders

**Funds Raised**

- Apr '21: $1.8M
- May '21: $3.1M
- Jun '21: $4M
- Jul '21: $4M
- Sept '21: $5.4M
- Oct '21: $8.6M
- Nov '21: $9.7M
- Dec '21: $10.2M

Peer-sourcing NGO recommendations from funders partners, ecosystem players, NGOs including OXFAM, Working People’s Charter, Azim Premji Foundation, Goonj, RCRC, Catalyst 2030

**Partnership with Roddenberry Foundation’s +1 Global Fund to support 30 peer-recommended NGOs**

**Feedback conversations with 22 NGO leaders, and insights gathered on the ever-changing realities on the ground**

**NGO Consultations & Capacity Building Module 1**

**Launch of the Rebuild India Fund**

**NGO Consultations & Capacity Building Module 2 @ The Dasra Philanthropy Week 2022**

**Webinar | Evolution of COVID in India, and How Should We Respond?**

**Webinar | Philanthropy in Crisis: Funding for Relief, Rebuilding & Resilience**

**Webinar | Against All Odds - The Plight & Contribution of India non-FCRA NGOs**

**#BackTheFrontline Funder Update #1**

**#BackTheFrontline Funder Update #2**

**#BackTheFrontline Funder Update #3**

**#BackTheFrontline Funder Update #4**
Coverage & Impact

Total Fund Outflow

- **$7.5M**
- **$10M**

- **Funds Committed for COVID Relief**
- **Funds Disbursed for COVID Relief**

*To ensure absorption capacity of NGOs, BTF grant is disbursed to them in 2 equal tranches. The second tranche is disbursed upon 75% or more utilization of the first one, which explains the difference between funds committed & funds disbursed.*

Geographical Coverage

- **15-20 orgs** (Rajasthan, Gujrat, Uttar Pradesh, Jharkhand, West Bengal, Karnataka, Madhya Pradesh)
- **3-4 orgs each** (Haryana, Tripura, Kerala, Goa, Punjab, Uttarakhand, Chhattisgarh, Meghalaya, Jammu & Kashmir)
- **5-10 orgs each** (Bihar, Assam, Telegana)
- **11-14 orgs each** (Delhi, Tamil Nadu, Odisha)
- **30 orgs** (Maharashtra)
- **+8 Orgs-Pan-India**

#BackTheFrontline Report 2021-2022
#BackTheFrontline End of Project Report 2021-22
Interventions Supported Under #BTF

When the second COVID wave took India by storm in April 2021, NGOs across India had to rapidly adapt their activities & programs to provide immediate COVID support, resulting in their undertaking relief interventions to fulfil the urgent needs of the vulnerable communities they serve.

Dasra supported these organizations by providing flexible & timely funds, enabling them to respond to the ever-changing on-ground needs and effectively support vulnerable communities.

This section highlights the interventions undertaken by grantees of #BTF - community-based NGOs that drove impact at the frontlines of India’s COVID response over the past 2 years.

- Institutional Support
- COVID Awareness, Information & Consultations
- Medical Equipment & Vaccinations
- Skilling, Livelihood & Education
- Financial Assistance
- COVID Care Essentials & Subsistence
- Training of Frontline Workers
The COVID pandemic not only saw communities grapple with numerous challenges - including lack of access to basic necessities such as food, medical support; loss of livelihoods, education and income; lack of COVID awareness & vaccine hesitancy, etc. - but also forced NGOs to address organizational challenges of their own.

Changes in the regulatory environment in 2021 adversely affected NGOs' access - especially that of smaller, community-based NGOs - to funds. In a nationwide survey, 92% NGOs reported having insufficient funds to respond effectively during the second COVID wave.

Through #BackTheFrontline, Dasra provided flexible funding to grassroots NGOs, so that they could wield the decision-making power to use these funds as they see fit - for programmatic and institutional costs alike. Some of our grantee NGOs used some of the #BTF funds to cater to the growing needs of human resources on the ground; to ensure the mental & physical wellbeing of their staff, etc. The flexibility of the #BTF grant also allowed NGOs to remain resilient throughout the pandemic, bolstering their ability to create impact.

**Institutional Support**

The COVID pandemic not only saw communities grapple with numerous challenges - including lack of access to basic necessities such as food, medical support; loss of livelihoods, education and income; lack of COVID awareness & vaccine hesitancy, etc. - but also forced NGOs to address organizational challenges of their own.

Changes in the regulatory environment in 2021 adversely affected NGOs' access - especially that of smaller, community-based NGOs - to funds. In a nationwide survey, 92% NGOs reported having insufficient funds to respond effectively during the second COVID wave.

Through #BackTheFrontline, Dasra provided flexible funding to grassroots NGOs, so that they could wield the decision-making power to use these funds as they see fit - for programmatic and institutional costs alike. Some of our grantee NGOs used some of the #BTF funds to cater to the growing needs of human resources on the ground; to ensure the mental & physical wellbeing of their staff, etc. The flexibility of the #BTF grant also allowed NGOs to remain resilient throughout the pandemic, bolstering their ability to create impact.

**66 Million+**

Lives Impacted by our partner NGOs via their overall relief efforts
As the pandemic spread into rural regions across the country, NGOs had to undertake the critical task of raising awareness about a novel virus, while also building community members’ trust in the public health system, and facilitating access to doctors & medical professionals.

#BTF grantee NGOs created awareness about COVID, the need for vaccinations, and dispelled myths about the virus and vaccinations through vehicle announcements, helplines, and group sessions. To ensure greater accessibility to medical professionals, rural doctors were trained, and online consultations were facilitated by these NGOs.

Our partner NGOs started out with providing essential medical equipment including PPE kits, oxygen concentrators & cylinders, ICU equipment, etc., to cover severe shortage of medical equipment. We were able to enter strategic partnerships with the Ministry of Health & Welfare of Jharkhand and Mission Oxygen to deploy oxygen concentrators in the 3 most adversely affected states of India - Maharashtra, Karnataka, and Delhi.

Over the course of the year, NGOs also played a critical role in raising awareness about vaccination - need, benefit, & myths; registering community members for vaccinations; and administering vaccines to members of remote, underserved communities.
The pandemic induced severe and long-lasting shocks to livelihoods of migrant workers, rural & tribal communities, farmers, etc. In response to the rise in unemployment caused by the long and successive lockdowns, our partner NGOs provided skilling workshops, helping community members generate income through alternate sources of livelihoods.

With schools being shut for close to 2 years, learning outcomes were taking a serious hit. Therefore, grantee NGOs worked to ensure that children had the means to continue education online, thus reducing the risk of them engaging in child labour and other exploitative practices.

At the peak of the pandemic, over 230 million people had fallen below the national wage poverty line ($5/day). To keep low-income families financially afloat, our partner NGOs provided direct cash transfers and facilitated access to welfare entitlements for the most vulnerable communities across India.
With two successive lockdowns claiming livelihoods, marginal communities’ access of basic nutrition and food was heavily compromised.

In response, our partner NGOs supported their communities by providing dry ration kits, cooked meals and other subsistence essentials, especially to families wherein one or more members were affected by COVID.

The pandemic broke the public health system and it cracked under the weight of the wild fire of COVID infections. In rural areas, where there anyway is limited access to public healthcare resources, it was most crucial to strengthen or build alternatives to trained medical professionals.

Our partner NGOs ensured that frontline workers like anganwadi workers, community volunteers, self help group (SHG) members, etc., received the necessary training and equipment to support their communities through healthcare, food supply, mental health support.
Beyond Fundraising

NGOs
- Capacity Building through 5 cohort-style sessions conducted by experts such as GuideStar India, Video Volunteers, Koita Foundation, etc.
- One-on-one conversations with funders for opportunities to strengthen long-term funding pipelines as well as funder relationships
- 6 Sector Consultations to create a platform for NGOs to discuss common as well as unique challenges, learnings, lessons, & best practices, and enhance efficiencies
- Exposure to mainstream funder network, of over 450+ givers, for lesser-known NGOs

Funders
- Opportunities to deepen understanding of the needs of vulnerable communities & NGOs through 3 multi-stakeholder webinars, and one-on-one conversations with supported NGOs
- Exposure to lesser-known, high impact NGOs & their work through 4 detailed impact reports

Sector
- Collaboration opportunities to improve efficiencies
- Familiarizing funders with giving practices like proximate, trust-based, and long-term giving while contextualizing these tenets with the needs of NGOs & communities so that philanthropists feel inspired to inculcate these practices in their long-term giving
- Knowledge creation & dissemination by sharing learnings from sector consultations & capacity building workshops, and impact reports with multiple stakeholders

Learnings & Way Forward

Learnings
- There is an entire ecosystem of NGOs that Dasra has not engaged with, who have been supporting and sustaining marginalized communities for years, but have been excluded from the traditional exposure, capacity building and funding circles.
- The most efficient way to reach the most grassroots NGOs – and therefore drive impact to the last mile – is to use existing funder & NGO partner networks, i.e., participative giving practices like peer-recommendations
- There has been a global shift in philanthropy, with an increased awareness of the need to address the vulnerabilities and inequities that exist in society. This has led to several givers, especially from next generation, to make more trust-based commitments with the intention to address inequities.
- Most NGOs value & gain more out of relatively smaller but consistent contributions over a longer period of time rather than large one-time contributions that can often create absorption & utilization pressures on the NGO

Way Forward
Taking cue from our learnings, experience, and most importantly, needs of NGOs & the communities they serve, Dasra and Tarsadia Foundation have launched the Rebuild India Fund – a 5-year resilience fund aimed at supporting 100 new grassroots NGOs each year with flexible funding and need-based capacity & exposure building support, giving them the power to serve meaningfully, and the flexibility to run their organizations as they see fit.
